

White River Community Solar

Come find out all about community solar!

Community solar allows individuals and businesses that are otherwise unable or unwilling to install solar on their residences or commercial buildings, to buy a portion of a shared solar array. The electricity generated by the solar array is credited to the customer's electricity bill, based on their share of the solar array. This is a project of the Energy Clinic at Vermont Law School and BALE (Building A Local Economy).

The Commons @ BALE

35 South Windsor Street, South Royalton

Thu., Nov. 19; 7:00 PM
