| Jeffersonville | For Jeffersonville to expand quality affordable healthcare options available to the local community. | Jeffersonville supports any reasonable proposal to locate a community health, dental, assisted living, or skilled nursing facility in the Village. New health facilities are encouraged in the Village Core, provided no new structures are created within the 100-year floodplain (as defined on the most recent FEMA maps). If such facilities are located within existing structures located within the floodplain, the structure shall be flood proofed in accordance with most recent FEMA guidelines. Given the vulnerable populations served by such facilities, measures should be taken to protect them during larger flood-events, including, but not limited to, elevating utilities to at least the 500-year flood elevation. | Jeffersonville supports the development of elderly housing, assisted living, and skilled nursing facilities that are compatible with the physical and cultural characteristics of the community and are properly protected against flooding, and are not located within the 100- year floodplain (as defined on the most recent FEMA maps). | Source <u>https://www.lcpcvt.org/vert</u> <u>ical/Sites/%7B3C01460C-</u> <u>7F49-40F5-B243-</u> <u>0CA7924F23AF%7D/uploads</u> /1. <u>Final_Jeffersonville_Villa</u> <u>ge_Plan.pdf</u> p.61-62 |
| | | [None provided.] | Jeffersonville supports investigating additional community wellness initiatives, such as a community paramedic program. | |
| Montpelier | Goal 2: More than 50 percent of Montpelier residents report that the availability of affordable quality health care | Policy 2a: By 2020, develop and use measures to regularly report citizens' opinions of the accessibility of affordable health services and the quality of care they receive. | [None provided.] | https://www.montpelier- vt.org/DocumentCenter/Vie w/4789/Master-Plan-2017- Adopted-December-20- |
| | in Montpelier is "good" or "excellent." | Policy 2b: Ensure Montpelier residents have access to a wide variety of health care services in a number of different forms. | 2b.1. Support efforts to create and sustain collaborations among providers, organizations, businesses, and individuals. Support existing and new outreach and prevention programs. 2b.2. Ensure Montpelier is a vibrant community that draws and retains health providers and professionals. 2b.3. Support the REACH Program, which is a Care Bank as a complementary system of health and elder care. | <u>2017?bidld=</u> p.232 |

| Jeffersonville | To maintain, develop, expand, and enhance recreational facilities and opportunities. | Jeffersonville recognizes the value of the planned Lamoille Valley Rail Trail, Cambridge Greenway, and other trail networks. Jeffersonville supports infrastructure investments that will allow businesses and community members to take full advantage of this opportunity. | Jeffersonville should identify and fill gaps in the existing recreation trail network and establish itself as a "hub" for local and regional recreation amenities. Jeffersonville, in partnership with other organizations and the Town of Cambridge, should develop a comprehensive plan for amenities, facilities, and aesthetics for the Lamoille Valley Rail Trail and other trail systems. Jeffersonville supports Cambridge Rail Trail Committee in their effort to extend Cambridge Greenway to Williamson Road, and eventually to Cambridge Village. | https://www.lcpcvt.org/vert ical/Sites/%7B3C01460C- 7F49-40F5-B243- 0CA7924F23AF%7D/uploads /1. Final Jeffersonville_Villa ge_Plan.pdf p. 61-62 |
| | | Jeffersonville supports responsible development of additional indoor and outdoor recreational facilities within the Village. Passive recreation such as trails is an acceptable use of areas within the 100-year floodplain (as defined on the most recent FEMA maps), provided no new structures are created. | The Village should work with other groups in the community to address various recreation issues, assist the development of recreational facilities, and support and coordinate the efforts of local recreation, trail, and conservation groups. Jeffersonville should continue to explore development of additional indoor and outdoor recreation and enrichment facilities. | |
| | To encourage more physical activity through land use plans and policies. | All public roads in Jeffersonville should provide for safe walking and biking. Jeffersonville's youth should be provided with opportunities to walk or bike to school, sound nutrition, and information pertinent to healthy living. | [None provided.] | |

| Morristown (continued) | [None provided.] | Increase access to park and recreation opportunities for all. Evaluate the additional cost associated with building and maintaining safe, pleasant streets for walking and biking, paying particular attention to high traffic areas by schools. Pedestrian and bike oriented transportation options provide residents with the option to walk/bike rather than drive, lessening traffic congestion, and improving our air quality. Prioritize protection and use of municipally owned recreational and natural spaces, including the Town Forest, Oxbow Riverfront Park, and the portions of the Clark property that can be safely accessed by the public (in relation to the active hydro facility, and the sensitive ecological integrity of this area). Improve and expand the existing trail system that accesses Oxbow Riverfront Park, including formalizing the footpath that connects the park to the terminus of Foundry St. Add an access point, or footpath, connecting Foundry Street to the Rail Trail, which would formalize Rail Trail access at each side of the Oxbow park peninsula, and also create a small walking loop through Oxbow Park that is accessed from the Rail Trail. Encourage the purchase of natural areas for recreational purposes and wildlife corridors. | [None provided.] | https://www.morristownvt. gov/zoning- planning/page/town-plan p.58 |

| Glover | Work toward making Glover an inclusive and safe community where people from all backgrounds and identities feel welcome and at home. | Encourage and expand volunteerism and citizen participation in the town's activities. | Encourage mentoring relationships and skill sharing between school children and community members, especially seniors. This could include reading programs, talent sharing, story-telling, art exhibits and job shadowing. Work to promote community spirit by offering various community activities. Take advantage of Lake Region Union High School community service program to help address community needs. Maintain a list of volunteer opportunities - on a public bulletin board, community calendar, Front Porch Forum, at Town Clerk's office, at school, and at the library. | https://townofglover.com/wp- content/uploads/2018-Glover- Town-Plan.pdf p.23 |
| | Goal 3. Seniors and people with disabilities report that they have the support and resources needed to live independently in the community. | 3a. Ensure that seniors and people with disabilities have the support and resources necessary to live independently. | 3a.3. Encourage seniors and people with disabilities to continue to participate in the community by volunteering, joining REACH and the Onion River Exchange, and/or attending community events. 3a.4. Strengthen and improve connections between different age groups, so that students and young people maintain relationships with seniors. | https://www.montpelier- vt.org/DocumentCenter/View/478 9/Master-Plan-2017-Adopted- December-20-2017?bidId= p.233 |
| Montpelier | Goal 4. By 2040, the capacity exists locally to provide all appropriate support services to people with mental illness. | 4a. Encourage engagement in the community to increase feelings of inclusion and belonging. In order to minimize conflict and stress, maintain Montpelier's welcoming nature and continue to develop strategies for incorporating diversity into the community. | [None provided.] | https://www.montpelier- vt.org/DocumentCenter/View/478 9/Master-Plan-2017-Adopted- December-20-2017?bidId= p. 234 |

Promote use of park and recreation facilities. 5. Consider accessibility when developing public spaces and recreational opportunities. | https://www.trorc.org/wp- content/uploads/2013/10/Plymou th-Adopted-Plan-2019-002.pdf p.55-56 |
| Reading | 1. Town officials, committees, business and other organizations or groups will actively promote health and wellness in Reading. | 10. Improve recreation sites and municipal facilities for accessibility and community gatherings. 11. Provide opportunities for recreation and community involvement. | The Reading Recreation Commission with the support of the Select Board will work to revitalize or repurpose Bartley Field. The Select Board will adopt policies for parking at the Twenty Foot Hole which may or may not include an increase or decrease in space. The policies will consider safety of vehicular and pedestrian traffic. The Town and the Recreation Commission will coordinate with neighboring communities to expand recreational opportunities for the Reading community. The Select Board, in partnership with the Planning Commission, should consider adopting a noise ordinance and/or a special events ordinance | https://readingvt.govoffice.com/v ertical/sites/%7B29D76170-2CBD- 4DB0-A089- 6F91F5BED766%7D/uploads/Read ing_Town_Plan_02_14_2022(1).p df p.94-96 |
| Royalton | Goal 1. Promote health and wellness in Royalton. | 5. Improve parks, recreation facilities, and open spaces for accessibility and community mingling. | 6. Consider accessibility when developing public spaces and recreational opportunities 10. Consider conducting Health Impact Assessments for proposed projects when appropriate. | https://www.trorc.org/wp- content/uploads/2013/10/Royalto n-Town-Plan-2020.pdf p.50-51 |
